

Teleiletişim ve Enformatik Teknolojileri Uygulama ve Araştırma Merkezi
(TETAM)

Doktora Öğrencileri Seminerleri

Yer: Zoom Webinar

16.04.2021 / 10:00-11.30

Nilay Başarır Baştürk, Analysis of the Small Repeating Earthquakes using OBS data for the Marmara Sea Region

Alper Köse, Graph-theoretical Dynamic User Pairing for Downlink NOMA Systems

Gökçe Hale Hatay, Feasibility of Averaged and Difference TE PRESS using long and short TE MR spectral data for 2HG detection in human brain tumors at 3T

Deniz Ekiz, Wearable Based Authentication

30.04.2021 / 10:00-11.30

Ali Erkan, Semantic Analysis by Using Different Tokenizations and Embedding Techniques

Figen Eşiköy, Slip Distribution of the 2020 Mw6.9 Samos Earthquake

Ahmet Emre Aladağ, Predicting Psychological Attributes from User Generated Content

21.05.2021 / 10:00-11.30

Alp Kındıroğlu, Deep Domain Adaptation for Sign Language Recognition

Gönül Ayıcı, Beware of the Uncertainty in Automated Privacy Decisions

Barış Yamansavaşçılar, DeepEdge: A Deep Reinforcement Learning based Task Orchestrator for Edge Computing

28.05.2021 / 10:00-11.30

Alper Alimoğlu, eBlocBroker: A Blockchain Based Autonomous Computational and Data Resource Broker

Alican Gök, Keyword Search

Muhammet Yunus Şeker, Temporal Multi-Modal Sensorimotor Prediction via Deep Modality Blending Networks
